

## WE ARE RECRUITING

### Who are we?

Marine & Environmental Research (MER) Lab is a marine environmental consulting and research SME formed in 2008, based in Limassol (Cyprus) and operating in Eastern Mediterranean.

MER conducts research, environmental monitoring and offers high quality and flexible consulting services, mainly in the sectors of marine ecology, aquaculture, and fisheries at Cyprus and abroad.

Over the last 10 years, we have successfully implemented several projects and research programs around coastal and offshore Cyprus and emerged as one of the major marine research entities of the island. This is the result of our passion, dedication and commitment to excellence and reliability.

### Who are we looking for?

We want passionate people who love the environment and what they do, and who are seeking for opportunities to grow, develop, and make the difference. We are looking for skilful, prepared candidates, with both written and verbal communications skills, able to work both in a team and independently, and prevail under pressure.

### Key responsibilities & duties

The selected candidate will be involved in all MER's projects. The list of projects is diverse and dynamic, but mainly focusing on the marine environment, research and conservation.

### Salary

The salary will depend on the candidate's experience and qualification.

### Academic & trades qualifications

#### Essential qualifications

- BSc and MSc or equivalent in Biology, Ecology, Conservation, Oceanography, Fisheries Biology, or related subject. At least one of either BSc or MSc should be in marine-related subject such as Marine Biology or Marine Sciences;
- Proven experience and participation in the implementation of projects related to the environment (\*exception to this qualification are MSc or PhD candidates who graduated in less than a year ago);
- Publications in peer-reviewed journals;
- Very good knowledge of Greek and English.
